

THEY

FALL 22

GINETTE NY

Our kids don't belong to us.
And I feel we have so
much to learn from them.
Every day.
THEY make us grow wiser
THEY are the future
It was such a blessing to
have them on the photoshoot
for the FAU 22 Collection.

Thank you,
Ari, Ella, Loulou, Lulu
and Stella.
You are so full of beautiful
emotions. You are smart,
funny and it felt so good
and so right to share this
moment with you.
I believe in you so much
And I love you
Leidinger Dawson

STELLA

I think that we are all so connected because of things like social media and the internet,
but at the same time we struggle with having empathy for others
because it's so easy to scroll, see things, and scroll away from it.

We tend to ignore a lot of people and other's problems.

A lot of things could be solved with a little more empathy, no matter how big or small the issue is.

LOULOU

I was born in NY, I am a NY Baby. I love NY so much, it's my home, I just love everything about it ... the people, the energy, the way that you can have a conversation on the street with a random stranger and it's totally ok like it is not a weird thing to do ...
yes NY is amazing !!

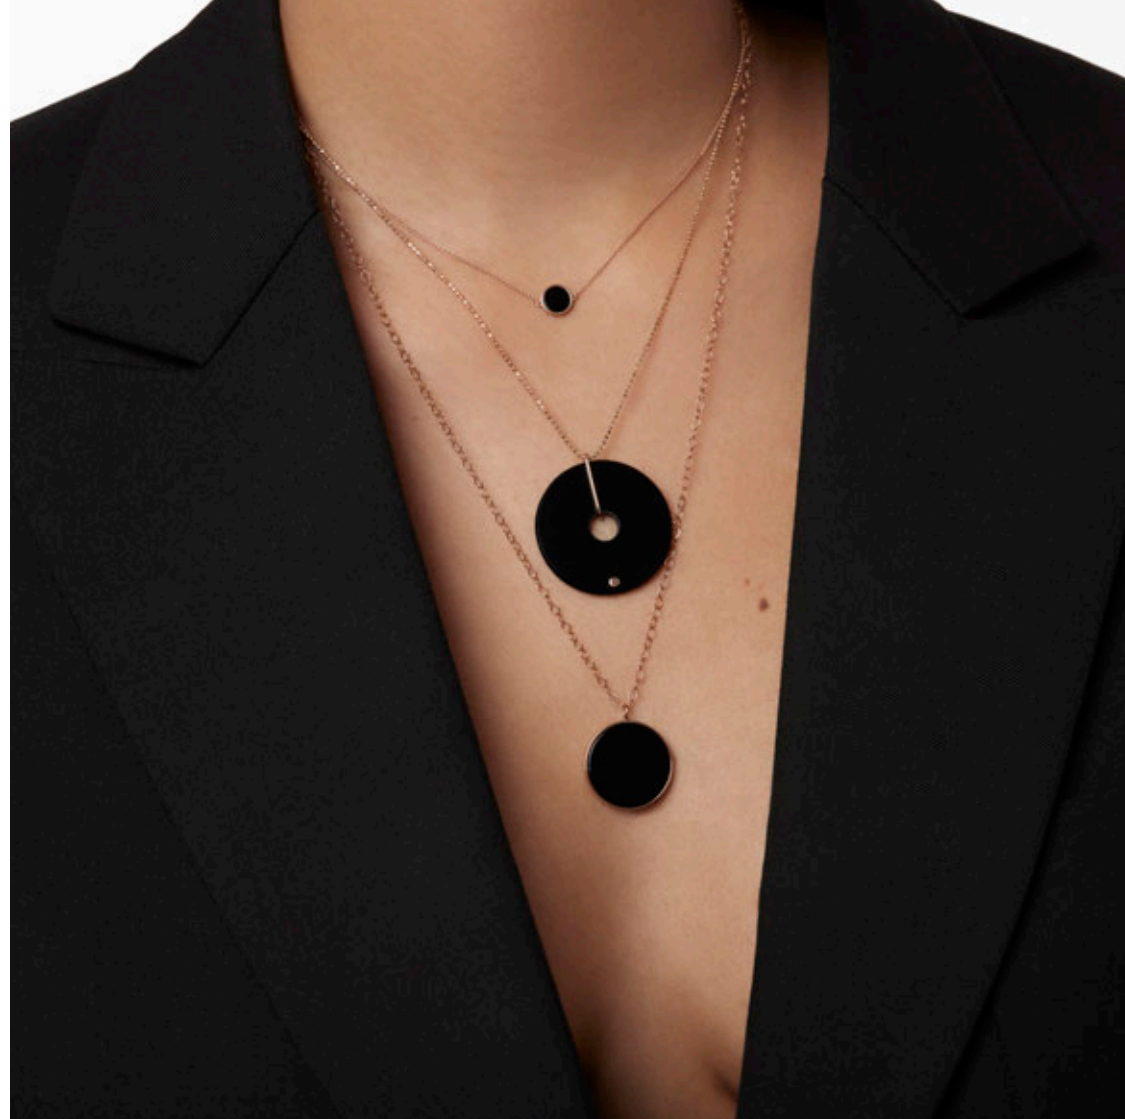

ELLA

There is this location under the Brooklyn Bridge, this skate park
and it is kind of an important place to me, I only went once, it was Covid times and
I did my whole first year of College from home online..... and I was absolutely exhausted
and deprived of the outside world.... so I took myself on a date!
I walked from my home to the Brooklyn Bridge and then I found this skate park and I sat down.
I drew some skaters, did some photos and videos and enjoyed the graffiti...
and ahh !!!..... when the subway would pass over the bridge on top of the skate park, it was just a symphony
of like..... BOOBOOBOOBOOM... BOOBOOBOOBOOM...BOOBOOBOOBOOM...
it was just like the heartbeat and it was stunning ... everything just felt right !

LULU

I see myself working in film, ultimately being a director.

I would like to work with narrative fiction, hopefully drama.

I like to watch horror movies, I like comedies a lot, but I don't know how funny I am, so I don't know if I would work in comedy. I also like science fiction thrillers.

ARI

I am a student who loves researching, science and math.

In the future I see myself as a researcher, and help
make the world healthier and a better place for everyone.

I would love to stop climate change because it affects nature which is
a part of the Earth that I really love.
